Components

Every control the product draws, what it is for, and where it is used.

Dark mode

GLYPHS

Icon
`Icon`
24dp glyphs on a 16 grid, 2px strokes, no fills — the colour is the control's. 16dp inside a button.

ui: folder · link · search · chevron · check · close · plus · upload · download
git: commit · push · pull · fetch · no-git

USED IN Every control with a glyph

ACTIONS

Button
`FilledButton` · `OutlinedButton`
48 tall, radius 8. Glyph and label centred together, 10 gap. Primary is the one action a surface is for; unavailable is a kind, not a state.

Primary · Secondary · Disabled
Primary · icon · Secondary · icon · Disabled · icon

USED IN Forms · toolbars · dialogs

Fab
`FloatingActionButton`
56 square, radius 8, on the primary container. One per screen at most.

USED IN One per screen at most

Chip
`FilterChip` · `AssistChip`
Rest, selected and unavailable, each with or without a leading check. The Diff chip in the mode bar is one.

Diff: Rest · Selected · Disabled
✓ Diff: Rest · icon · Selected · icon · Disabled · icon

USED IN Filters · toolbars

INPUTS

Text field
`TextField`
Outlined only, 56 tall. The label sits in the box and floats to the top on focus, which is the whole of the widget's behaviour.

Label — Rest
Label: Option two — Focused

USED IN Commit message · Branch name

Column field
`TomFieldBoxWidget`
The small field a side column holds — search, replace. 28 tall, and drawn rather than decorated, so an empty one is not shorter.

Placeholder

USED IN Search · replace

Field clear
`IconButton`
16 at the field's trailing edge, in text_muted. Present only while the field has something in it.

USED IN Every field that can be emptied

Search bar
`SearchBar`
Leading glyph and a hint rather than a label. Same radius as the field, so the two agree.

Search

USED IN Toolbars · lists

Checkbox
`Checkbox`
An 18 box inside a 48 target. One item, or all of them.

☐ Unchecked · ☑ Checked

USED IN Lists · forms

Radio
`Radio`
One of a set. 20 circle, 10 dot.

○ Off · ● On

USED IN Forms

Switch
`Switch`
A setting that takes effect at once. The thumb grows from 16 to 24 when on — the size change is the state.

Off · On

USED IN Settings

Slider
`Slider`
A continuous value. 4 track, 20 thumb.

USED IN Settings

CHOICE

Segmented · 2
`SegmentedButton`
One choice out of a few. The chosen one takes the mark, so the state is not colour alone.

One | Two — One selected
One | Two — Two selected

USED IN Toolbars

Segmented · 3
`SegmentedButton`
The same control at three segments — the mode bar's Source · Split · Preview.

One | Two | Three — One selected
One | Two | Three — Two selected
One | Two | Three — Three selected

USED IN The mode bar

Tabs
`TabBar`
48 tall, a 3px indicator. For panels that stack views, never for navigation.

First · Second · Third

USED IN Panels that stack views

Select control
`OutlinedButton + MenuAnchor`
A value that is a control, not a label: choosing starts here.

Option one — Default
Option one — Open

USED IN Toolbars

CHROME

Panel toggle
`IconButton`
28 × 22. Outline and divider are always drawn; the strip fills when that panel is open.

left open · left closed · right open · right closed · bottom open · bottom closed

USED IN The workspace bar

Theme toggle
`IconButton`
The panel toggle's grammar with one half filled, so the three read as one set.

theme

USED IN The workspace bar

Status mark
`Container`
A letter as well as a colour, because roughly one in twelve men cannot separate red from green.

M Modified · A Added · D Deleted · R Renamed · N New · C Conflicted

USED IN Lists · gutters

Badge
`Badge`
The pending or unread mark, beside the thing it marks.

● Item name
a row with something pending

USED IN List rows · tabs

Column grip
`MouseRegion`
Three 2px dots at half the window's height, inside a gutter. It is the only thing that says a width can be dragged.

USED IN Gutters between columns

Toolbar button
`IconButton`
28 square, radius 8, a 24 glyph centred. Seventeen of them are the formatting bar.

B

USED IN The formatting bar

Progress bar
LinearProgressIndicator
A 3px strip across the top of the panel that owns the request. Drawn only while one is in flight.

USED IN The git column, while it waits on the remote

SURFACES

Card
`Card`
Radius 8, a 1px border and no shadow. It sits in the page.

USED IN Lists of things to open

Popover
`OverlayPortal`
The card that floats. The shadow is the difference — a surface that leaves the page says so, and one that does not must not borrow it.

USED IN The branch switcher

Menu
`MenuAnchor` · `PopupMenuButton`
Radius 8, 48 rows, the overlay shadow. A popover anchored to the control that opened it.

Option one ✓
Option two
Option three

USED IN Anchored to a control

Dialog
`AlertDialog`
Two variants, two actions and three. 400 wide, radius 8, 24 padding; the actions are stacked full width, the safe one first.

One · Two · Three
Three actions

USED IN Blocking questions

Scrim
`ModalBarrier`
Black at 55%, resized to the window. A dim is not part of the card, so every modal dims by the same amount.

Plain · Dimmed

USED IN Behind a dialog

Notice band
`ColoredBox`
h 36, the width of the document area. <role>_soft fill and no rule of its own; sentence left, one action right.

Something happened, and this is what to do about it. Action

USED IN News from git

Snackbar
`SnackBar`
The outcome of an action that succeeded, on the inverse surface.

Three items were saved UNDO

USED IN After an action succeeds

Light mode

GLYPHS

Icon
