Foundations

Colour roles and the type scale — the tokens every screen is built from.

Colours and type

Colours

The roles of visual-language/README.md, as library colours: light/<role> and dark/<role>.

LIGHT

surface	surface raised	surface sunken	border	border strong	text primary	text secondary	text muted	accent	accent soft	added	added soft	removed	removed soft	modified	modified soft
#EEF0F3	#FFFFFF	#F6F8FA	#E1E4E8	#C9CED6	#1F2328	#4E5561	#8A919B	#1A9C7B	#DDF5EE	#5A9E2B	#EDF6E3	#CF222E	#FFEBE9	#9A6700	#FFF5D6

DARK

surface	surface raised	surface sunken	border	border strong	text primary	text secondary	text muted	accent	accent soft	added	added soft	removed	removed soft	modified	modified soft
#131416	#1E1F22	#191A1D	#2B2D31	#3E4148	#DFE1E5	#A8ADB6	#6E737C	#4FD1B0	#15302A	#9BCB5E	#1E2A17	#EF7B76	#301C1C	#E2B45C	#2C2516

Typography

IBM Plex Sans · Mono · Serif — the scale is in docs/design/components/type.md, and lives here as library typographies under type/.

The quick brown fox jumps over the lazy dog	heading-lg · IBM Plex Sans 600 · 24/1.3
The quick brown fox jumps over the lazy dog	heading · IBM Plex Sans 600 · 17/1.35
The quick brown fox jumps over the lazy dog	body-read · IBM Plex Serif 400 · 16/1.7
The quick brown fox jumps over the lazy dog	body-split · IBM Plex Serif 400 · 15/1.7
The quick brown fox jumps over the lazy dog	ui · IBM Plex Sans 400 · 13/1.4
The quick brown fox jumps over the lazy dog	ui-strong · IBM Plex Sans 600 · 13/1.4
`The quick brown fox jumps over the lazy dog`	code · IBM Plex Mono 400 · 12.5/1.6
The quick brown fox jumps over the lazy dog	caption · IBM Plex Sans 400 · 12/1.4
PANEL CAPTION	label · IBM Plex Sans 600 · 10/1.4
The quick brown fox jumps over the lazy dog	status · IBM Plex Sans 400 · 11/1.4

Radius

Two steps and a shape. Anything that is round by definition — the switch track, the radio, the badge, the slider — is circular, which is not a step.

- sm 4 — checkbox · status mark · tab indicator · column field
- md 8 — everything else
- circular — switch · radio · badge · slider

Elevation

One level, for what floats over the content. Everything else that needs an edge takes a hairline instead — a card sits in the page, it does not hover above it.

- `overlay 0 4 12 · 14%` — menu · dialog · snackbar
- `hairline 1px border` — card · panels · dividers

Colours
